DETAILED ACTION

Election/Restrictions

Note: The election submitted 4/12/06 has been received, however, upon further review a new restriction requirement is required. Applicant is advised to make a new election based on the claim groupings set forth below.

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 39-47, drawn to a method of joining.

Group II, claim(s) 10-28 and 48-52, drawn to a fastener element.

Group III, claim(s) 29-31, drawn to a riveting die.

Group IV, claim(s) 32-38, drawn to a component assembly.

2. The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires the special technical feature of the ejection of a slug and broadening of the hole which is not required by Groups II, III, and IV; Group II requires the special technical feature of a truncated cone section having a cone angle of 90 degrees which is not required by Groups I, III, and IV; Group III requires the special technical feature of a ring recess having a ring step which is not required by Groups I, II, and IV; Group IV

Art Unit: 3726

requires the special technical feature of the groove having a wave like base surface which is not required by Groups I, II, and III. Since each of Groups I, II, III, and IV having special technical features which are distinct from one another, then restriction as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

4. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
